WHAT THE WORLD OFFERS — FULL RANGE: 0.0000...01 PERCENTILE TO 100TH PERCENTILE PERFECT

A ladder of 13 types of person, from the floor — 0.0000...01 percentile, the rank she named (living with schizophrenia) —
to the 100th percentile: Perfect, maximum on every front at once. Across 20 dimensions of life and reality.
For every tier and every dimension: what they have — and what they ALSO have that the tier below does not.
Everything and everyone that gives, withholds or prices the offer is in scope: the world (things), society (people,
institutions, norms), and the factors that shift one person's offer inside their tier.

THE LADDER

Tier 1 [0.0000...01 percentile — the floor (the rank she named)]: Living with schizophrenia / severe mental illness — The floor she named: disability-supported or unsupported, in a developed-country system (e.g. ODSP-class benefits in Ontario, public psych
Tier 2 [Bottom band — below the 10th percentile]: Poverty on social assistance — General welfare benefits, no disability designation; food banks, shelters and public systems carry the gaps.
Tier 3 [≈10th–25th percentile]: Working poor — Full-time or near-full-time minimum-wage work; employed but with no margin after rent and food.
Tier 4 [≈25th–40th percentile]: Lower-middle class — Stable work, renting or a small mortgage, tight but predictable budget, some credit access.
Tier 5 [50th percentile — the median]: Middle class (median household) — Dual or solid single income around the national median; owns or is buying a home; the statistical centre of a developed country.
Tier 6 [≈75th–90th percentile]: Upper-middle class (credentialed professionals) — Doctors, lawyers, senior managers, senior engineers; top-decile incomes, strong benefits, real savings.
Tier 7 [Top 10% — ≈90th percentile]: Affluent — top 10% — Business owners and executives; investments beyond retirement accounts; money stops being a weekly question.
Tier 8 [Top 1% — ≈99th percentile]: Rich — top 1% — Seven-figure net worth and six-to-seven-figure incomes; buys time, access and options as routine purchases.
Tier 9 [Top 0.1% — ≈99.9th percentile]: Very rich — top 0.1% — Eight-figure net worth; professional advisers on retainer; doors open on a phone call.
Tier 10 [Top 0.01% — ≈99.99th percentile]: Ultra-wealthy — top 0.01% — Nine-figure net worth; a family office or its equivalent; treated as an institution, not a customer.
Tier 11 [Top 0.001% — ≈99.999th percentile]: Elite — top 0.001% — Ten-figure territory or equivalent power; shapes markets, policy rooms and institutions rather than applying to them.
Tier 12 [Top 0.0001% — ≈99.9999th percentile]: Cream of the crop — top 0.0001% — The extreme tier: a few thousand people worldwide at most. The world reorganises itself around their preferences; almost nothing is priced, queued for, or refused.
Tier 13 [100th percentile — PERFECT (the ceiling)]: Perfect — maximum on every front at once — The theoretical ceiling of the range: a person at the maximum of all 20 dimensions simultaneously — no scarcity, no trade-off, no decay beyond biology's limi

THE SHEETS

MASTER LIST — 780 entries, enumerated 1-780 = 13 tiers x 20 dimensions x 3 entries. Each block of 3 shares one ALSO line:
what that tier additionally has, in that dimension, over the tier immediately below. Tier 1's ALSO states the floor itself.
WHEEL OF LIFE — the 20 dimensions grouped into the 10 Wheel of Life segments, with the offer at the floor, at the ceiling,
and the step that changes each segment most.
ABILITY STATS — an offer index, 0-100, for all 13 tiers x 20 dimensions, plus the Perfect tier's stat block (100 on every front).
WHAT SOCIETY OFFERS — 78 rows: for each tier, what society itself offers across 6 aspects (systems, institutions, market,
strangers, standing, norms).
FACTORS THAT SHIFT THE OFFER — 16 factors (culture, location, societal norms, personality, health, family, credentials,
timing and luck, and the rest) that raise or lower one person's actual offer inside their tier.
HOW TO IMPROVE EACH FRONT — one row per dimension: the lever, the first step from the floor, the step that crosses tiers,
and what it compounds into.

HONEST FRAMING

Percentile labels are tier shorthand for resource bands, not verified population counts — no registry ranks people
'across all fronts of reality'. Money figures are indicative Oct 2026 Canadian/developed-country planning figures.
0.0000...01 percentile is her notation for the absolute floor — a share so small it is effectively one person in an
unlimited population. The 100th percentile Perfect tier is a theoretical ceiling: no living person maxes all 20 fronts
at once; it is included as the endpoint of the range and described by the same rules as every other tier.
ABILITY STATS are a modelled index measured against that perfect ceiling — so even the median tier sits low. That is
the point of the scale: 100 means perfect, not average.
The ladder is descriptive: it says what the world and society offer at each level, not what a level is worth as a person.
Tiers 1-12 of the MASTER LIST are carried over unchanged from What_The_World_Offers_By_Type_Of_Person.xlsx (Oct 23).

PERSON ATTRIBUTES BY PERCENTILE — 57 attributes of the person themselves (intelligence incl. gifted and genius levels, health, physique, character, capacities, attainment, and every life domain), each percentiled on its own distribution from the floor

Entry #	Tier	Type of person	Dimension	#	What they have	What it looks like at this tier	ALSO — what this tier has that the tier below does not
1	Tier 1	Living with schizophrenia / severe mental illness	Wealth, Money & Finance	1	Disability benefit cheque	A monthly disability payment (ODSP-class, roughly $1,300-$1,500/month in Ontario) is the entire financial system	The floor itself: in a developed country the state, not the market, is the provider of last resort.
2	Tier 1	Living with schizophrenia / severe mental illness	Wealth, Money & Finance	2	Public drug coverage	Prescription psychiatric medication covered by the state drug benefit; no private insurance	
3	Tier 1	Living with schizophrenia / severe mental illness	Wealth, Money & Finance	3	No credit, no buffer	Credit cards, loans and savings are effectively absent; one missed payment cascades	
4	Tier 1	Living with schizophrenia / severe mental illness	Access, Networks & Doors That Open	1	Case worker as gatekeeper	Access to almost everything runs through a case worker, clinic or agency intake	Also has: a file, a diagnosis and a worker — being known to the system is itself a form of access.
5	Tier 1	Living with schizophrenia / severe mental illness	Access, Networks & Doors That Open	2	Charity doors	Food banks, drop-ins, churches and nonprofits are the open doors; institutional doors are closed	
6	Tier 1	Living with schizophrenia / severe mental illness	Access, Networks & Doors That Open	3	Peer networks	Other patients, group members and shelter communities form the real social network	
7	Tier 1	Living with schizophrenia / severe mental illness	Homes, Land & Property	1	Supported or rooming housing	Group homes, supportive housing, a rented room, or a shelter bed — rarely a lease of one's own	Also has: a legal right not to sleep outside in most developed cities — emergency shelter exists even when housing doesn't.
8	Tier 1	Living with schizophrenia / severe mental illness	Homes, Land & Property	2	Subsidised transit pass	Many cities issue low-income or disability transit passes; the city is reachable but not owned	
9	Tier 1	Living with schizophrenia / severe mental illness	Homes, Land & Property	3	Public space as living room	Libraries, drop-in centres and parks function as daytime shelter and social space	
10	Tier 1	Living with schizophrenia / severe mental illness	Travel, Mobility & Movement	1	Walking and public transit	Movement is on foot and by bus; intercity travel is rare and usually for appointments or family	Also has: freedom of movement inside the country in law — the limit is money, not permission.
11	Tier 1	Living with schizophrenia / severe mental illness	Travel, Mobility & Movement	2	Medical travel only	Trips happen for treatment, hearings or benefits reviews — the system moves them, they don't roam	
12	Tier 1	Living with schizophrenia / severe mental illness	Travel, Mobility & Movement	3	One city, known routes	Deep knowledge of a small territory: which drop-in, which clinic, which bench is left alone	
13	Tier 1	Living with schizophrenia / severe mental illness	Health, Body & Longevity	1	Public psychiatry	A psychiatrist, community mental-health team and crisis line through the public system, with wait lists	Also has: healthcare as a right of residence in most developed countries — treatment is not billed at the point of crisis.
14	Tier 1	Living with schizophrenia / severe mental illness	Health, Body & Longevity	2	Involuntary care framework	Crisis intervention and hospitalisation exist as a legal safety net, wanted or not	
15	Tier 1	Living with schizophrenia / severe mental illness	Health, Body & Longevity	3	Primary care through clinics	Community health centres provide basic care; dental and vision are the common gaps	
16	Tier 1	Living with schizophrenia / severe mental illness	Security, Privacy & Protection	1	Legal aid and rights law	Mental-health law, consent law and legal aid clinics exist specifically to protect this tier	Also has: formal legal personhood and rights that advocates and courts will enforce, even with no money.
17	Tier 1	Living with schizophrenia / severe mental illness	Security, Privacy & Protection	2	Police as first responders	Safety is public and reactive — 911, crisis teams — not private or preventive	
18	Tier 1	Living with schizophrenia / severe mental illness	Security, Privacy & Protection	3	Vulnerability is the risk	The main security problem is exposure: to scams, exploitation and street violence	
19	Tier 1	Living with schizophrenia / severe mental illness	Knowledge, Education & Mentors	1	The library as university	Free public libraries, internet and programming are the tier's real education system	Also has: open access to the world's information through the library card — the one elite tool issued free.
20	Tier 1	Living with schizophrenia / severe mental illness	Knowledge, Education & Mentors	2	Psychoeducation and groups	Programs teach the diagnosis itself — symptom management, benefits navigation, life skills	
21	Tier 1	Living with schizophrenia / severe mental illness	Knowledge, Education & Mentors	3	No credentials market	Degrees are out of reach mainly through cost, health interruptions and lost years, not ability	
22	Tier 1	Living with schizophrenia / severe mental illness	Influence, Power & Voice	1	A vote	One vote, equal in law to any billionaire's, in municipal to national elections	Also has: democratic franchise and Charter/human-rights protections that money cannot legally outrank.
23	Tier 1	Living with schizophrenia / severe mental illness	Influence, Power & Voice	2	Lived-experience voice	Advisory boards and consultations formally seek this tier's input on the systems that govern them	
24	Tier 1	Living with schizophrenia / severe mental illness	Influence, Power & Voice	3	No public voice	No platform, no lobby, no media access — influence is collective or absent	
25	Tier 1	Living with schizophrenia / severe mental illness	Time, Freedom & Calendar Control	1	Time without ownership	Days are unstructured but not free: appointments, queues, pharmacy runs and benefit rules set the calendar	Also has: more unscheduled hours than any working tier — time exists, autonomy over it does not.
26	Tier 1	Living with schizophrenia / severe mental illness	Time, Freedom & Calendar Control	2	Waiting as a tax	Clinics, offices and phone lines consume hours that wealthier tiers buy back	
27	Tier 1	Living with schizophrenia / severe mental illness	Time, Freedom & Calendar Control	3	No schedule power	Others set the times — doctors, workers, landlords — and lateness is punished by the system	
28	Tier 1	Living with schizophrenia / severe mental illness	People: Staff, Experts & Service	1	Assigned, not chosen, experts	Care is delivered by whoever the clinic assigns; choice of doctor or therapist is minimal	Also has: a surrounding apparatus of public servants whose salaries the tier's taxes-in-kind (and society) fund.
29	Tier 1	Living with schizophrenia / severe mental illness	People: Staff, Experts & Service	2	Volunteers and students	Much day-to-day help comes from volunteers, students and peer workers	
30	Tier 1	Living with schizophrenia / severe mental illness	People: Staff, Experts & Service	3	No one on call for them	Problems are queued, not answered; there is no one whose job is their convenience	
31	Tier 1	Living with schizophrenia / severe mental illness	Food, Drink & the Table	1	Food bank and community meals	Nutrition runs through food banks, meal programs and the cheapest calories available	Also has: in a developed country, outright starvation is rare — calories exist; quality and dignity are what's scarce.
32	Tier 1	Living with schizophrenia / severe mental illness	Food, Drink & the Table	2	Institutional food	Hospital, shelter and program meals set much of the diet's quality ceiling	
33	Tier 1	Living with schizophrenia / severe mental illness	Food, Drink & the Table	3	Cooking in constrained spaces	A hot plate or shared kitchen; fresh food spoils without storage, so processed food dominates	
34	Tier 1	Living with schizophrenia / severe mental illness	Pleasure, Play & Experience	1	Free public pleasures	Parks, libraries, broadcast media, community events and faith communities are the entertainment tier	Also has: the same free digital ocean as everyone — the content is equal, the device and data plan are not.
35	Tier 1	Living with schizophrenia / severe mental illness	Pleasure, Play & Experience	2	The phone as cinema	A cheap smartphone and free tiers of video/music are the main private luxury	
36	Tier 1	Living with schizophrenia / severe mental illness	Pleasure, Play & Experience	3	Day programs as social life	Art groups, drop-in activities and clubs run by agencies provide structured enjoyment	
37	Tier 1	Living with schizophrenia / severe mental illness	Art, Beauty & Culture	1	Program art and music	Art therapy, community choirs and library collections provide real cultural access	Also has: public museums and galleries on free days — the canon is open to view, not to own.
38	Tier 1	Living with schizophrenia / severe mental illness	Art, Beauty & Culture	2	No ownership of culture	Attendance is free-day and program-based; collections, instruments and lessons are rare	
39	Tier 1	Living with schizophrenia / severe mental illness	Art, Beauty & Culture	3	Personal creative output	Notebooks, drawings and songs produced without an audience or a market	
40	Tier 1	Living with schizophrenia / severe mental illness	Objects: Rare Goods & Collections	1	Very few possessions	Belongings often fit in bags or one room; loss and theft are recurring events	Also has: legal title to what little exists — property law protects a shopping bag as surely as a vault, in principle.

Entry #	Tier	Type of person	Dimension	#	What they have	What it looks like at this tier	ALSO — what this tier has that the tier below does not
41	Tier 1	Living with schizophrenia / severe mental illness	Objects: Rare Goods & Collections	2	Issued objects	What exists is issued or donated: clothes, a phone, a transit pass, medication	
42	Tier 1	Living with schizophrenia / severe mental illness	Objects: Rare Goods & Collections	3	Documents as treasure	ID, health card and benefit papers are the most valuable objects owned — losing them is a crisis	
43	Tier 1	Living with schizophrenia / severe mental illness	Technology & Tools	1	A basic smartphone	Often the single piece of modern technology: calls, texts, free apps, benefit portals	Also has: connection to the same internet as the top tier — the network does not price admission.
44	Tier 1	Living with schizophrenia / severe mental illness	Technology & Tools	2	Public computers	Library terminals for email, forms and job or benefit applications	
45	Tier 1	Living with schizophrenia / severe mental illness	Technology & Tools	3	Technology as surveillance risk	The same tools expose this tier most: scams, predatory apps, no backup devices	
46	Tier 1	Living with schizophrenia / severe mental illness	Nature, Animals & the Outdoors	1	City nature	Parks, ravines and waterfronts are genuinely shared wealth in developed cities	Also has: the public realm itself — the developed city's parks and libraries are this tier's estate.
47	Tier 1	Living with schizophrenia / severe mental illness	Nature, Animals & the Outdoors	2	No pets, usually	Housing rules and cost bar animal companionship, though street pets exist	
48	Tier 1	Living with schizophrenia / severe mental illness	Nature, Animals & the Outdoors	3	Weather as exposure	Cold and heat are health events, not inconveniences — cooling centres and warming rooms exist for this tier	
49	Tier 1	Living with schizophrenia / severe mental illness	Family, Children & Dynasty	1	Family at a distance	Relationships are often strained or distant; the system (workers, programs) substitutes for kin	Also has: the legal right to marry, have children and make medical decisions — formal equality holds at the floor.
50	Tier 1	Living with schizophrenia / severe mental illness	Family, Children & Dynasty	2	No dynasty mechanics	No inheritance to give or receive, no family assets to protect or pass on	
51	Tier 1	Living with schizophrenia / severe mental illness	Family, Children & Dynasty	3	Chosen family	Peers from programs and shelters form the functional family unit	
52	Tier 1	Living with schizophrenia / severe mental illness	Citizenship, Law & Structure	1	Citizenship or residence rights	In a developed country, this tier holds the same passport and legal status as the median citizen	Also has: due process, appeal rights and a tribunal system that can be fought in — and sometimes won.
53	Tier 1	Living with schizophrenia / severe mental illness	Citizenship, Law & Structure	2	Benefits law as constitution	Entitlements, appeals and tribunals — the tier's real legal life is administrative law	
54	Tier 1	Living with schizophrenia / severe mental illness	Citizenship, Law & Structure	3	Criminalisation pressure	Poverty itself is policed: loitering, fare evasion, encampment bylaws press on daily life	
55	Tier 1	Living with schizophrenia / severe mental illness	Information & Intelligence	1	Case-file knowledge	The system knows them in detail — diagnoses, histories, addresses — while they know little of it	Also has: legal rights to their own records — freedom-of-information and health-record access apply to them too.
56	Tier 1	Living with schizophrenia / severe mental illness	Information & Intelligence	2	Rumour and word of mouth	Practical intelligence travels peer-to-peer: which shelter, which worker, which lineup moves	
57	Tier 1	Living with schizophrenia / severe mental illness	Information & Intelligence	3	No private intelligence	No advisers, no briefings; information about their own case is requested, not delivered	
58	Tier 1	Living with schizophrenia / severe mental illness	Legacy, Meaning & What Remains	1	Being a cautionary tale	This tier's public meaning is assigned by others — in policy debates, charity appeals, news stories	Also has: the possibility the system officially believes in — rehabilitation and recovery are written into its mandate.
59	Tier 1	Living with schizophrenia / severe mental illness	Legacy, Meaning & What Remains	2	Recovery as legacy	Surviving, stabilising or helping peers is the realistic legacy form; some become peer workers and advocates	
60	Tier 1	Living with schizophrenia / severe mental illness	Legacy, Meaning & What Remains	3	No estate	What remains is a story and a file; material legacy is nil	
61	Tier 2	Poverty on social assistance	Wealth, Money & Finance	1	Welfare cheque plus patchwork	Social assistance (roughly $700-$900/month single in Ontario) topped up with food banks and odd work	Also has, over Tier 1: no diagnosis required — the money is smaller but the surveillance of daily life is lighter.
62	Tier 2	Poverty on social assistance	Wealth, Money & Finance	2	Payday and fringe credit	Payday loans, rent-to-own and cheque-cashing at punishing rates fill the gaps the banks refuse	
63	Tier 2	Poverty on social assistance	Wealth, Money & Finance	3	Chronic arrears	Rent, utilities and phone bills rotate through arrears; disconnections and evictions are live risks	
64	Tier 2	Poverty on social assistance	Access, Networks & Doors That Open	1	Agency doors	Employment centres, settlement and community agencies are the institutional interface	Also has: eligibility itself as an asset — being provably poor unlocks programs the merely struggling cannot use.
65	Tier 2	Poverty on social assistance	Access, Networks & Doors That Open	2	Informal networks	Kin, neighbours and co-workers from past jobs are the real referral system	
66	Tier 2	Poverty on social assistance	Access, Networks & Doors That Open	3	No bought access	Nothing opens because of who they are; everything requires queuing and proving eligibility	
67	Tier 2	Poverty on social assistance	Homes, Land & Property	1	Subsidised or last-resort housing	Social-housing waitlists measured in years; meanwhile the cheapest private rooms and basements	Also has: tenant law on paper — notice periods and tribunals apply even when enforcement is slow.
68	Tier 2	Poverty on social assistance	Homes, Land & Property	2	Shelter system knowledge	Exact knowledge of shelter rules, curfews and meal times is survival capital	
69	Tier 2	Poverty on social assistance	Homes, Land & Property	3	Couch-surfing network	Reciprocal arrangements with kin and friends substitute for a lease	
70	Tier 2	Poverty on social assistance	Travel, Mobility & Movement	1	Transit and walking	Bus passes are a major budget line; a car is usually absent or unreliable	Also has: the full public transit network at the low-income fare — mobility exists, priced in time.
71	Tier 2	Poverty on social assistance	Travel, Mobility & Movement	2	Moving for benefits and beds	Relocation happens for shelter space, family or cheaper rent — not for opportunity	
72	Tier 2	Poverty on social assistance	Travel, Mobility & Movement	3	Trapped geography	Jobs across town can be unreachable: two buses and ninety minutes each way	
73	Tier 2	Poverty on social assistance	Health, Body & Longevity	1	Public clinics and ER	Care through walk-in clinics and emergency departments; no family doctor for many	Also has: emergency medicine without a bill at the door in Canada-class systems — catastrophe is treated, prevention is not.
74	Tier 2	Poverty on social assistance	Health, Body & Longevity	2	The dental gap	In most developed systems teeth, eyes and mental-health therapy sit outside public coverage — pain is managed, not treated	
75	Tier 2	Poverty on social assistance	Health, Body & Longevity	3	Work-injury exposure	The jobs available are the physically risky ones, with the least protection	
76	Tier 2	Poverty on social assistance	Security, Privacy & Protection	1	Reactive public safety	Safety depends on police response and neighbourhood conditions, not private measures	Also has: the same criminal-law protection as everyone in statute — the gap is in response time and recovery.
77	Tier 2	Poverty on social assistance	Security, Privacy & Protection	2	Theft and precarity	What little exists is stealable and uninsured; replacement is a crisis	
78	Tier 2	Poverty on social assistance	Security, Privacy & Protection	3	Scam exposure	Predatory lending, rental scams and benefit fraud target this tier specifically	
79	Tier 2	Poverty on social assistance	Knowledge, Education & Mentors	1	Adult basic education	Free upgrading, literacy and high-school completion programs exist and are genuinely open	Also has: their children's full claim on public education — the one escalator the developed country runs for free.
80	Tier 2	Poverty on social assistance	Knowledge, Education & Mentors	2	Children in public school	The kids' schooling is the same public system the middle class uses — the ladder's first real rung	
81	Tier 2	Poverty on social assistance	Knowledge, Education & Mentors	3	No slack to study	Courses are free but time is not: survival work consumes the hours study needs	

Entry #	Tier	Type of person	Dimension	#	What they have	What it looks like at this tier	ALSO — what this tier has that the tier below does not
82	Tier 2	Poverty on social assistance	Influence, Power & Voice	1	A vote and a voice in numbers	Influence exists only collectively: unions, tenants' groups, community organising	Also has: eligibility to organise — tenant unions and legal clinics amplify what one voice cannot.
83	Tier 2	Poverty on social assistance	Influence, Power & Voice	2	Being campaigned to	Politicians court this tier at election time and forget it between — attention without power	
84	Tier 2	Poverty on social assistance	Influence, Power & Voice	3	No individual platform	A grievance becomes real only if media or an advocate picks it up	
85	Tier 2	Poverty on social assistance	Time, Freedom & Calendar Control	1	Time ruled by others' clocks	Benefit appointments, shelter curfews, food-bank hours and shift offers structure the week	Also has: in principle, the same 24 hours — the tier difference is who else must be obeyed inside them.
86	Tier 2	Poverty on social assistance	Time, Freedom & Calendar Control	2	Unpaid waiting	Lineups and hold music consume the equivalent of a part-time job	
87	Tier 2	Poverty on social assistance	Time, Freedom & Calendar Control	3	No purchasable time	Every errand is done personally, slowly, at the cheapest hour	
88	Tier 2	Poverty on social assistance	People: Staff, Experts & Service	1	Front-line public servants	Help arrives through overloaded workers with caseloads in the hundreds	Also has: a professional class assigned to them by the state — social work exists because this tier does.
89	Tier 2	Poverty on social assistance	People: Staff, Experts & Service	2	Charity labour	Volunteers staff the food banks, kitchens and clothing depots this tier depends on	
90	Tier 2	Poverty on social assistance	People: Staff, Experts & Service	3	No retained anyone	Advice is a pamphlet or a fifteen-minute appointment, once	
91	Tier 2	Poverty on social assistance	Food, Drink & the Table	1	Cheapest calories win	Diet is engineered by price per calorie: starches, processed meat, sugar — fresh food is a luxury line	Also has: developed-country food safety law — even the cheapest food is inspected, dated and regulated.
92	Tier 2	Poverty on social assistance	Food, Drink & the Table	2	Food-bank hamper cycle	Monthly hampers set a rhythm; the last week of the month is the hungry one	
93	Tier 2	Poverty on social assistance	Food, Drink & the Table	3	Cooking skill as capital	Those who can cook dried beans and stretch a chicken eat markedly better on the same money	
94	Tier 2	Poverty on social assistance	Pleasure, Play & Experience	1	Free and broadcast pleasures	Library media, free events, faith and community gatherings, public sport courts	Also has: the city's free cultural calendar — festivals and fireworks do not check income at the gate.
95	Tier 2	Poverty on social assistance	Pleasure, Play & Experience	2	One small screen	A phone or old TV with free tiers; subscriptions are shared, pirated or absent	
96	Tier 2	Poverty on social assistance	Pleasure, Play & Experience	3	Gambling as false door	Lotteries and slots are marketed hardest here — the taxed hope of the tier	
97	Tier 2	Poverty on social assistance	Art, Beauty & Culture	1	Public culture	Museums on free days, library concerts, school and community theatre	Also has: heritage itself — the language, songs and foodways of their own cultures travel free.
98	Tier 2	Poverty on social assistance	Art, Beauty & Culture	2	Religious and cultural festivals	Faith communities carry art, music and ceremony at no ticket price	
99	Tier 2	Poverty on social assistance	Art, Beauty & Culture	3	No lessons, no instruments	Children's arts training is the first casualty of the budget — talent goes unbuilt	
100	Tier 2	Poverty on social assistance	Objects: Rare Goods & Collections	1	Second-hand everything	Furniture, clothes and appliances come from thrift stores, donations and curbs	Also has: consumer law — warranties and returns technically apply, though rarely worth enforcing alone.
101	Tier 2	Poverty on social assistance	Objects: Rare Goods & Collections	2	A phone as the one new thing	The smartphone is often the sole current-generation object owned	
102	Tier 2	Poverty on social assistance	Objects: Rare Goods & Collections	3	Nothing insurable, nothing stored	No storage unit, no safe, no collection — possessions are what the rooms hold	
103	Tier 2	Poverty on social assistance	Technology & Tools	1	Prepaid mobile	Pay-as-you-go plans, data scarcity, phones kept for years past their prime	Also has: the same apps and platforms as the rich — access is universal, bandwidth and hardware are not.
104	Tier 2	Poverty on social assistance	Technology & Tools	2	Public Wi-Fi dependence	Library and café Wi-Fi substitute for a home connection	
105	Tier 2	Poverty on social assistance	Technology & Tools	3	Digital-by-default friction	Benefits and jobs have moved online; this tier queues for the computers to apply	
106	Tier 2	Poverty on social assistance	Nature, Animals & the Outdoors	1	Parks and public waterfront	The ravines, beaches and trails of a developed city are open without a fee	Also has: environmental law's protection — the air and water standards apply to poor neighbourhoods in law, unevenly in fact.
107	Tier 2	Poverty on social assistance	Nature, Animals & the Outdoors	2	Community gardens	Garden plots and food-growing programs offer land in miniature

PERSON ATTRIBUTES BY PERCENTILE — EVERY ATTRIBUTE THAT IDENTIFIES A PERSON AND THEIR LEVEL

Each attribute is percentiled on its OWN distribution: the floor (0.000…01th percentile) to the 100th percentile — Perfect. A rank on one attribute does not set the rank on any other; real people are jagged — high on some fronts, low on others. Gifted begins around the 98th-99th percentile on cognitive attributes; genius around the 99.99th and above. Modelled descriptors; measured anchors (IQ, income multiples, lifespan) use standard developed-country scales.

2	Tier 1	Living with schizophrenia / severe mental illness	Institutions (health, law, education)	Public psychiatry and emergency care; the law meets them mostly as a risk to manage; education effectively closed without support
3	Tier 1	Living with schizophrenia / severe mental illness	Employers & the market	Employers largely closed; the market offers only its cheapest goods and its least secure housing
4	Tier 1	Living with schizophrenia / severe mental illness	Strangers & the public	Met with stigma, fear or pity — the public's default is distance
5	Tier 1	Living with schizophrenia / severe mental illness	Community standing & voice	Near-zero voice: spoken about in policy, rarely spoken with; advocacy comes from others

7	Tier 2	Poverty on social assistance	Public systems & benefits	General welfare, food banks, shelters — a floor below subsistence, always conditional
8	Tier 2	Poverty on social assistance	Institutions (health, law, education)	Clinics and courts as queues; schools open on paper, costly in practice

13	Tier 3	Working poor	Public systems & benefits	Working benefits and credits top up wages; one emergency away from the tier below
14	Tier 3	Working poor	Institutions (health, law, education)	Full access on paper; time poverty rations it in practice
15	Tier 3	Working poor	Employers & the market	Essential and underpaid: employers offer hours, not security
16	Tier 3	Working poor	Strangers & the public	Respectable invisibility — the uniform is seen, not the person

18	Tier 3	Working poor	Norms & expectations applied	Dignity conditional on effort; exhaustion is the expected state
19	Tier 4	Lower-middle class	Public systems & benefits	Mostly self-funded; public systems as backstop, tax credits at the margins

#	Factor	Raises the offer when...	Lowers the offer when...	Example / note
1	Culture & country system	Welfare-minded cultures raise every tier's floor: benefits, care and housing are generous by default	Purely market cultures lower the floor: the same tier means queues, conditions and gaps	The identical tier lives materially differently in Toronto than in a low-benefit jurisdiction.
2	Location — city & neighbourhood	Rich, safe, service-dense places multiply the offer: jobs, care, transit and culture within reach	Remote, deprived or unsafe areas ration the offer whatever the tier	A Tier 3 income buys a different life in a small town than in central Toronto.
3	Societal norms of place & era	Norms that prize care destigmatise the floor and fund its support	Norms that prize only productivity punish everyone below the median	In eras of stigma, Tier 1's offer collapses toward custody; in eras of care, it rises toward support.
4	Personality	Drive, openness and conscientiousness convert offers into outcomes; systems-minded people compound small offers	Passivity lets offers lapse unclaimed — benefits, courses and credits expire unused	Two people at Tier 5: one claims every credit and course available; one claims none.
5	Appearance & presentation	Polish opens doors at every tier — interviews, service, trust	Visible disorder closes doors before a word is spoken	The same applicant, groomed or not, is offered different work at Tiers 3–6.
6	Health & diagnosis	Robust health raises what any tier can actually use of its offer	Illness taxes every dimension at once; diagnosis stigma is an extra tax on the floor tier	Stigma is the floor tier's heaviest single tax — it discounts offers no law can restore directly.
7	Family & people who show up	Loyal people act as an unofficial welfare system: meals, rooms, loans, advocacy	Isolation removes the net between tiers — one bad month drops a person two rungs	A Tier 2 person with a devoted family often lives above a Tier 4 person who is entirely alone.
8	Education & credentials	Credentials convert the same labour into standing, options and recruitment	Their absence caps the market's offer regardless of ability	A recognised degree moves Tier 4 labour into Tier 6 recruitment.
9	Language & accent	Fluent majority language unlocks institutions, forms and interviews	Language gaps ration every institutional offer, quietly and completely	Newcomers routinely live one tier below their credentials.
10	Age & life stage	Prime working years maximise the offer at every tier	Childhood, frailty and advanced age ration it, whatever the wealth	The same person is offered more at 40 than at 80 on the same money.
11	Legal status & record	Clean status keeps every door unlocked: work, travel, housing, credit	A record or precarious status locks doors at all tiers, often permanently	A criminal record at Tier 6 still costs jobs, borders and trust.
12	Digital access & literacy	The connected claim, learn, earn and book faster in every system	The offline are quietly excluded — offers increasingly exist only behind a login	Benefits, jobs and healthcare appointments now assume a smartphone.
13	Religion & community membership	Strong communities feed, house, employ and visit their own — a parallel offer at every tier	Belonging to no community leaves the state and the market as the only offers	A congregation can function as Tier 5 infrastructure for a Tier 2 member.
14	Gender & identity presentation	In some places and eras, presentation is priced in a person's favour by default	Discrimination discounts the offer without changing the tier — same rank, smaller world	In audit studies, identical CVs earn different callbacks under different names.
15	Wealth within the tier — assets vs debt	Asset-holders live above their income: the offer compounds	Debtors live below their income: the offer leaks before it arrives	A Tier 5 homeowner without debt out-lives a Tier 6 renter carrying heavy debt.
16	Timing & luck — era, economy, health events	Booms, peace and good health raise a whole generation's offers at once	Recessions, wars, pandemics and accidents cut offers no effort can refuse	Being born in one decade rather than another changes the offer more than most choices do.

#	Dimension	The lever	First step from the floor	The step that crosses tiers	What it compounds into
1	Wealth, Money & Finance	Income minus spending, then assets that earn on their own	Claim every benefit, credit and refund you are owed — unclaimed money is the floor's biggest leak	One income above the benefit/wage line, plus a 3-month buffer	Options: the ability to refuse bad deals
2	Access, Networks & Doors That Open	Being known, named and introduced	Keep every appointment and learn every worker's name — files that are known are files that move	One person two tiers up who will say your name in a room	Doors that open before you knock
3	Homes, Land & Property	Tenure security before size or beauty	A lease or supported placement in your name, kept in good standing	Ownership of the first modest property	An asset, and an address that anchors every application
4	Travel, Mobility & Movement	Documents first, then range	ID, health card and a passport — the paperwork of movement	A vehicle, or the income that makes distance cheap	A life that can relocate toward opportunity
5	Health, Body & Longevity	Continuity of care and the daily basics, defended	One clinician, medication kept steady, sleep protected	Prevention bought early: teeth, eyes, screening, fitness	Years of capacity — the substrate every other front is built on
6	Security, Privacy & Protection	Records, locks and low exposure	Copies of your documents kept safe; a door that locks; passwords in a manager	Insurance and legal counsel arranged before you need them	A life that one bad event cannot knock down
7	Knowledge, Education & Mentors	A system that keeps what you learn	A library card, a daily hour, and a notebook that is actually re-read	A credential the market recognises	Judgement — the asset that appreciates in every tier
8	Influence, Power & Voice	A record people can point to	Publish or present one useful thing where your community can see it	A role — board, council, organiser — with your name on the minutes	A voice that arrives before you do
9	Time, Freedom & Calendar Control	Defend hours the way you defend money	One fixed daily block that is yours, protected from appointments and drift	Buying back hours: help, tools, proximity	A calendar authored by you
10	People: Staff, Experts & Service	Reciprocity — give before you need	Be useful to one person regularly; reliability is the entry fee	Hire or retain the first expert — accountant, lawyer, coach	A circle that carries you through a bad year
11	Food, Drink & the Table	Skill beats budget	Ten dishes cooked well from cheap ingredients	Quality staples, and one great meal out monthly	Health and pleasure from the same table
12	Pleasure, Play & Experience	Scheduled novelty, however small	One new free experience a week — route, park, exhibit, sky	Travel and events budgeted as a line, not a leftover	A life that generates stories, not just days
13	Art, Beauty & Culture	Make one thing; see the best free things	Public galleries, libraries and broadcasts — the free canon	Lessons, and one serious instrument or tool	Taste — and eventually, work with your name on it
14	Objects: Rare Goods & Collections	Buy once, buy right, keep the records	One quality tool you use daily, maintained	Provenance-grade pieces, bought slowly	A small collection that appreciates instead of cluttering
15	Technology & Tools	One device, fully mastered	A phone or computer you actually control: updates, backups, passwords	Tools that automate your admin — files, reminders, money	Leverage: hours returned every week
16	Nature, Animals & the Outdoors	Proximity and routine	A daily outdoor hour; one park known by season	A garden, a bicycle, a cottage share — nature on your own terms	Restoration built into the week
17	Family, Children & Dynasty	Presence on a schedule, not on impulse	Fixed contact — calls, meals, dates kept like appointments	Support given before it is asked: time, money, advocacy	Bonds that survive distance and decades
18	Citizenship, Law & Structure	Paper in order, rights known	ID, status, taxes filed, voters' list — the citizen's starter kit	Professional standing: licences, memberships, a clean record kept	Full membership in the systems that decide things
19	Information & Intelligence	Sources ranked, noise cut	Follow primary sources; keep a file of what you have verified	Paid intelligence where it pays: data, alerts, expert briefings	Decisions made earlier, and better, than the crowd's
20	Legacy, Meaning & What Remains	Produce; do not only consume	One artefact with your name on it — a file, a work, a record kept for others	A will, an archive, a fund, a student — something structured to outlast you	A name that remains a fact after you
