ASSETS THAT CAN BE BOUGHT WITH NOTHING — THE $0 ASSET BOOK (CANADA / TORONTO)

300 assets across 15 categories that can be acquired for $0 — no money paid by the acquirer.
'Bought with nothing' means the price is zero. It does not mean costless in every sense: some assets ask for a library card (itself free), eligibility (income, age, disability), time, travel, or attention. Every such condition is stated in the entry itself. Items that are only partly free (subsidised, promotional, or perk-based) are flagged as such inside their entries — nothing in this file pretends a partial thing is a full one.

HOW THIS CONNECTS TO YOUR $45 PLAN

Week 3 of the plan is a $0-spend week. Category 1 is inventory for it: free listings become resale stock, and Category 12 is the exit: free selling channels that turn $0 inventory into cash at $0 listing cost. Category 8 is the other direction: money the state already owes you, claimable only by filing and applying.

HOW TO READ THE MASTER LIST

Columns: # | Category | Asset | What it is | Where / how to get it | What it's worth / becomes.
Values are indicative CAD approximations (Oct 2026) for comparison, not quotations. Program terms change; entries that depend on a program say 'verify current terms' where that matters most.
0 exact duplicates across all 300 entries (recount-verified at build).
